

M.T. MONTAGGI

Industrial racking and steel structure installation

Precision, safety and speed, across Italy and Europe

Via Alfonso Sanseverino 3, 29122 Piacenza (PC) · mtmontaggi.org

About us

M.T. Montaggi is a Piacenza-based contractor specialising in the assembly, installation and dismantling of industrial racking, steel structures and equipment for the logistics, industrial, commercial and construction sectors.

Qualified crews, equipment for working at height and rigorous site planning: we work for major logistics and industrial groups, in full compliance with Italian safety law (D.Lgs. 81/08).

Services

01

Industrial racking

Assembly and dismantling of pallet racking, drive-in, multi-tier, mobile and static archive systems.

02

Steel structures

Installation of heavy and light steel work, canopies and steel frames.

03

Mezzanines and platforms

Mezzanines, modular structures and made-to-measure storage systems.

04

Composite decking

Installation of composite corrugated steel decking for floors and roofs.

05

New logistics hubs

Support for new warehouses and logistics centres, including cold storage.

06

Ductwork and services

Metal ducts, cable trays, wall passages, air handling units and technical supports.

07

Inspection and photo report

End-of-works check with a snag list of non-conformities and photographic documentation.

08

Support and maintenance

Adjustment, repair and maintenance of storage systems.

How we work

1

Site survey

Analysis of the site, loads and site constraints.

2

Quotation

Detailed offer, schedule and dedicated crew.

3

Safety

Site safety plan (POS), DUVRI and coordination with the client before access.

4

Installation

Trained crews, own equipment, controlled progress.

5

Inspection and handover

Final check, photo report and closure of snag items.

Safety and compliance

Safety is not an add-on: it is how we enter every site.

Documentation

- Regular DURC (INPS and INAIL)
- Site safety plan (POS) and DUVRI for every job
- Anti-mafia self-certification and technical-professional requirement declarations
- Compliance with D.Lgs. 81/08
- Third-party and employer liability insurance (RCT/RCO)

Crew qualifications

- General and specific training, high risk
- First site access, fire-safety officer
- Forklifts and tower cranes
- Mobile elevating work platforms, with and without outriggers
- Category III PPE, work at height, suspension rescue
